A little bit about myself..

Where is the space for young professionals and people at the top of the ladder to speak?

Why is this space needed?

- “You don’t work in the space what do you know?”
- “You don’t even have a degree yet”

Ivory Towers

- No women – 1 young person (A translator)
- Very little framework for youth participation
- Upsetting
- Disempowering
- But, when it's done right anything is possible

How can we improve

- Over 20% of the world's population are young people
- We aren't the decision makers of the future, we are the decision makers of the now
- The research that young people need to know about is not young person friendly
- Try to include the activists working on topics that aren't as media friendly as climate action
- Be flexible
- Engage
