Conference Programme

@IrelandDSA #DSAI2021

Wednesday 10th November | 5:45pm - 7:00pm An Evening with Gustavo Esteva

Beyond Climate and Institutional Collapse: Openings to a New Era

The Guardian was right: climate change or global warming are euphemisms. There is a climate collapse. And the institutional collapse is even worse. We can no longer put our hope in governments or international conferences, as the current show in Glasgow demonstrates. But a new hope is emerging at the grassroots. Beyond the mobilizations, increasingly useless, we have all kinds of initiatives, as La Travesía, the Zapatista tour in Europa, is making evident. Yes, it is time to say YES to life and NO to the projects of death and war.

Gustavo and Discussant Dr Orla Donovan are welcomed by DSAI Chair, Nita Mishra, with Opening Remarks by Michelle Winthrop, Policy Director, Development Cooperation and Africa Division, Department of Foreign Affairs.

Gustavo Esteva is a Mexican activist, "deprofessionalized intellectual" and founder of the Universidad de la Tierra in the Mexican city of Oaxaca. He is well known for his contribution to the post-development theory and practice. A prolific writer, he is the author of more than 40 books, published in seven languages. Among his numerous academic honors: an Honorary Doctorate (Honoris Causa), the National Award for Political Economy, and the National Award for Journalism. He has served as president of the Mexican Society of Planning and the 5th World Congress on Rural Sociology and Chairman of the Board for the United Nations Research Institute for Social Development.

Discussant Dr Orla O'Donovan is Senior Lecturer in the School of Applied Social Studies, University College Cork. Her research and teaching is centrally concerned with social imaginaries of progress, health and medicine. She is Principal Investigator for the Wellcome Trust funded project 'Living well with the dead in contemporary Ireland'

The 2021 Annual Conference of Development Studies Association Ireland (DSAI), runs November 11th-12th, coinciding with the 26th United Nations Climate Change Conference in Glasgow (COP26). The conference intends to provoke a debate amongst scholars, development practitioners, activists, and others, to facilitate further thinking and study about what type of climate we need for development and how we place our climate concerns front and centre in our post-pandemic world.

The COP26 summit

The 26th UN Climate Change Conference of the Parties (COP26) in Glasgow on 31 October – 12 November 2021 brings parties together to accelerate action towards the goals of the Paris Agreement and the UN Framework Convention on Climate Change. The **COP26 Green Zone** is open to the public to attend in person and virtually. Youth groups, civil society, academia, artists, business from across the UK and all over the world host events, exhibitions, cultural performances, workshops and talks at the Glasgow Science Centre. With over 100 exhibitors, 200 events and 11 sponsors taking over the space, there is a wealth of opportunities to listen, learn and connect with this wider dialogue on climate action.

Join events virtually via the COP26 YouTube channel: <u>https://www.youtube.com/c/cop26</u>

For more info about COP26 visit <u>www.ukcop26.org</u>

Conference Theme

The Paris Agreement sets out a global framework to avoid dangerous climate change by limiting global warming to well below 2°C and pursuing efforts to limit it to 1.5°C. Despite this ambitious agreement, political leaders everywhere have failed to take decisive action to achieve the goals. Large investment deals threaten forests, mangroves, and fishery reserves, destroying many carbon sinks and wildlife habitats forever. Those who contribute least to global warming have become most vulnerable to climate change through the loss of crops, housing and land in adverse weather events.President Higgins said:

Such is the scale of the challenge facing us that the mere placing of a lens on the narrow, the disconnected, existing failed paradigms, or the tweaking of the edges of existing models is not sufficient to address the economic, societal and environmental transformations that are needed. (OECD Conference, 9 Oct 2020)

How can we play our part to reduce climate change and advocate for national and global action from governments, from corporations and energy producing companies? What can we do to protect those who are suffering the consequences of global warming? Heading towards the close of the SDG era in 2030 we need to ask if we have sustained the right climate for the transformative shift that is urgently needed by our planet and its inhabitants. Have we been sustaining colonial, extractive and unjust models of development or have we managed to establish transformative alternatives? What is the right climate of development?

Development Studies Association Ireland

Dialogue between research, policy and practice

Vision

The vision of DSA Ireland is the creation of a vibrant and innovative development studies community, which will focus on cutting edge research, led by Irish research institutions, contributing to the reduction of poverty, inequality and vulnerability in the world.

Our Mission

Our mission is to provide an open and participatory space for dialogue between researchers, policy-makers, and practitioners, who have an interest in, or are working in the area of international development. We will achieve this by:

- supporting cohesion and capacity-building in the development studies sector;
- promoting strategic alliances and partnerships to grow the development studies sector;
- harnessing research which supports and promotes coherent evidencebased development policy and practice aimed at the reduction of global poverty, the enhancement of all forms of equality and respect for human rights.

The Development Studies Association Ireland (DSAI) is Ireland's association for researchers, policymakers and practitioners working in the field of international development.

The DSAI is supported by funding from Irish Aid and of our institutional members whose annual contributions make our activities possible.

Individual membership of DSAI is free.
