Impact of COVID-19 in Zambia

Worldometer

#	Country, Other	Total Cases	New Cases	Total Deaths	New Deaths	Total Recovered	Active Cases	Serious, Critical	Tot Cases/ 1M pop	Deaths/ 1M pop	Total Tests	Tests/ 1M pop	Population
118	Zambia	1,632		30		1,348	254	1	89	2	56,825	3,091	18,382,115

- Africa as a continent has so far seen relatively few COVID-19 cases and deaths
- Some theories expect that African countries are expecting the “peak” of infections and deaths later in the year 2020
- There are high unemployment and poverty level, insufficient resources for education, transportation, communication and healthcare on a daily basis
- Many of the communities are in lack basis sanitation and health resources, which makes them extremely vulnerable to the COVID-19 pandemic
