Around the world, displacement is one of the biggest barriers to education. Refugee children are five times more likely to be out of school than other children. Many children and young people affected by humanitarian crises face huge challenges accessing primary, secondary and further education. As the global community works towards the universal goal of ensuring inclusive and equitable quality education for all (SDG4), this panel brings together perspectives on education for displaced and refugee populations internationally, as well as here in Ireland, to discuss challenges, opportunities and innovative responses.
